

Columbia Gas' contractor, Utility Services Group, is in East Manchester Township televising sanitary and storm lines, looking for natural gas cross bores. A natural gas cross bore is an inadvertent intersection of a gas line and either a sanitary or storm line. The inspection is a part of a statewide safety program. Most of the time, customers do not need to be involved. If a gas cross bore is found, there is no cost to the customer for remediation. For more information on cross bores, visit [columbiagaspa.com/safety/natural-gas-safety/sewer-line-safety](http://columbiagaspa.com/safety/natural-gas-safety/sewer-line-safety) or email [cpacrossbore@nisource.com](mailto:cpacrossbore@nisource.com). If you believe you have a cross bore, call 1-888-460-4332.
